

## SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY

---

Enterprise Standards and Best Practices for IT Infrastructure 4th Year 2nd Semester 2014

---

**4th Year 2nd Semester 2014**

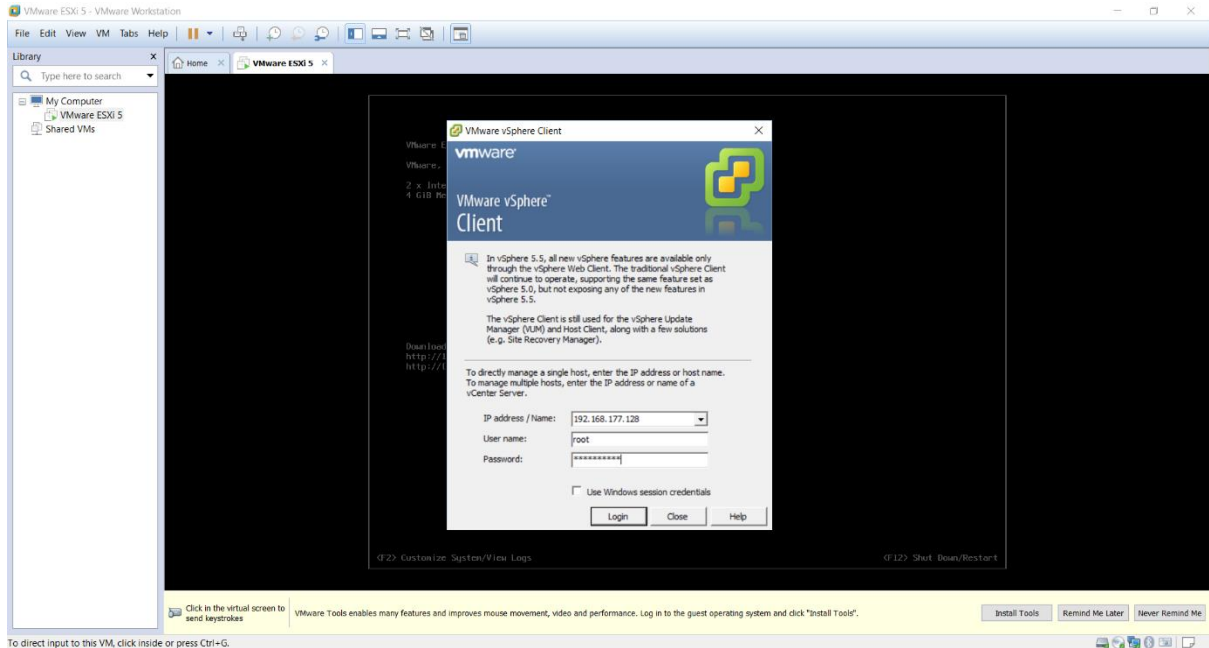

Name: Dedigamuwa D.A.T.D.

SLIIT ID: IT13103378

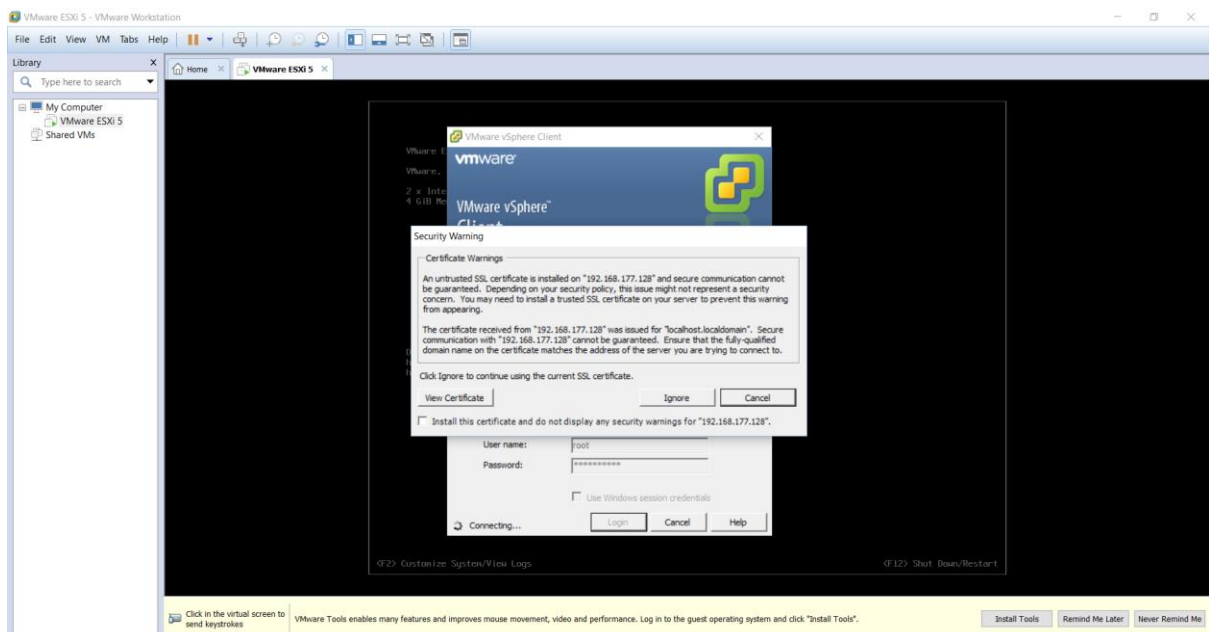

Practical Session: WD Friday

Practical Number: Lab 4

- **Step 01**  
Install VMware vSphere Client software and start it.  
Provide the IP address of ESXi 5 host, the root username and password.  
Click 'Login'.

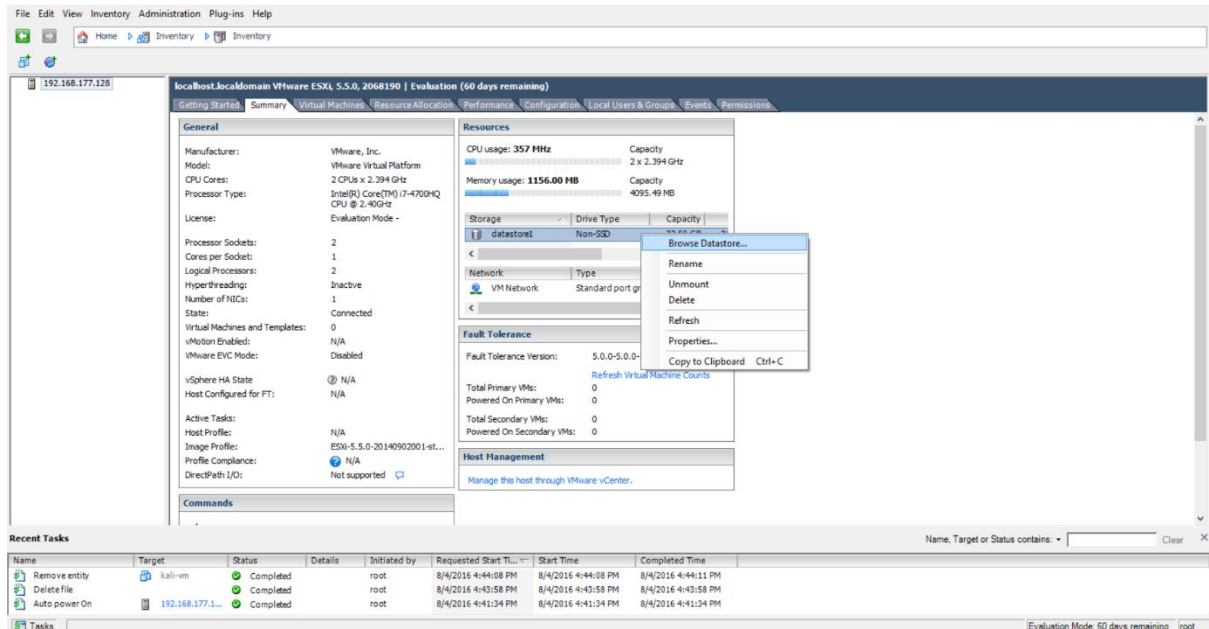

- **Step 02**  
Ignore the SSL certificate security warning.

- Step 03

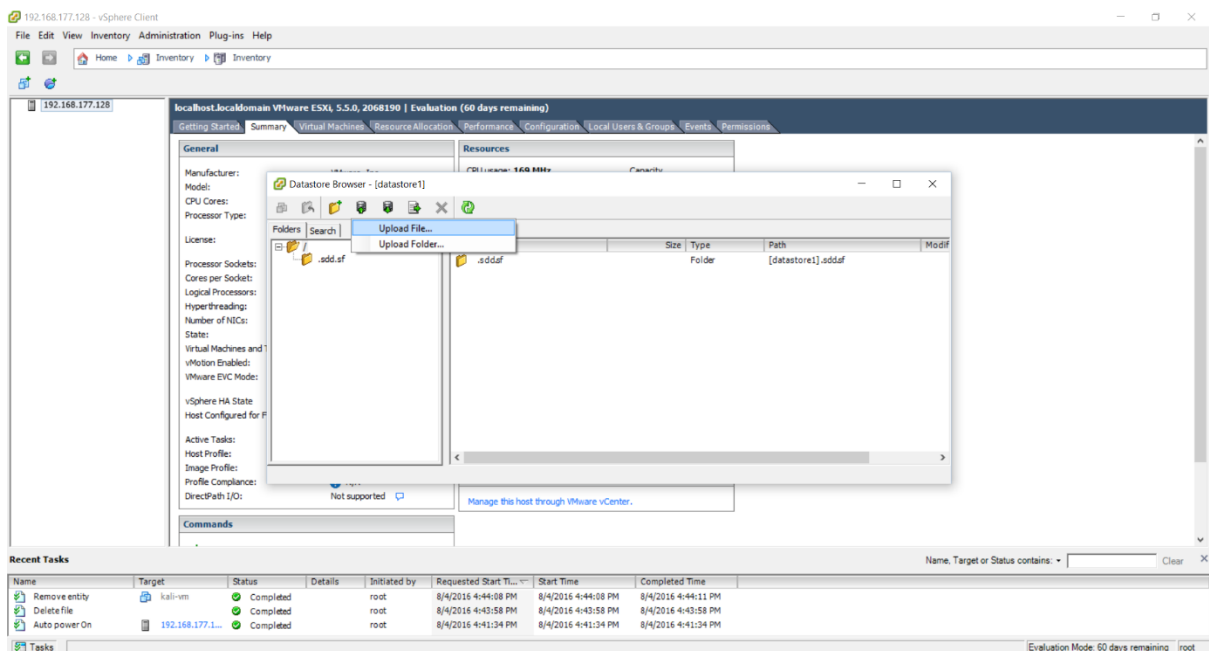

Go to the 'Summary' tab.

Right click on 'datastore1' from 'Storage' category and choose 'Browse Datastore...'

- Step 04

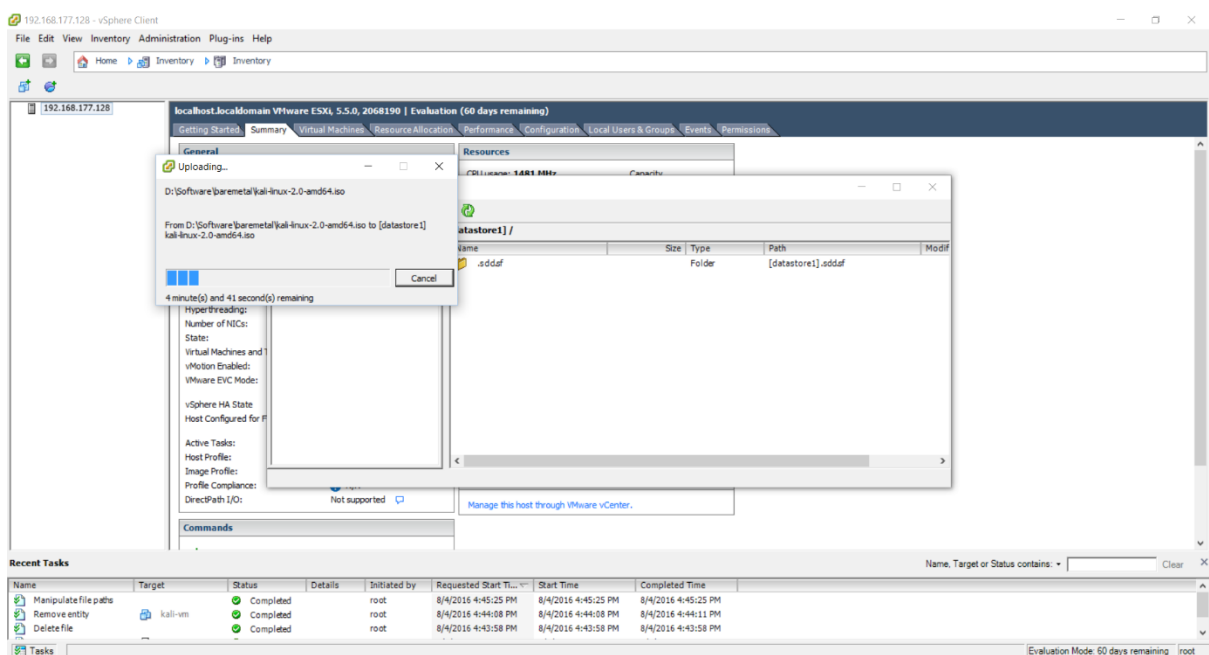

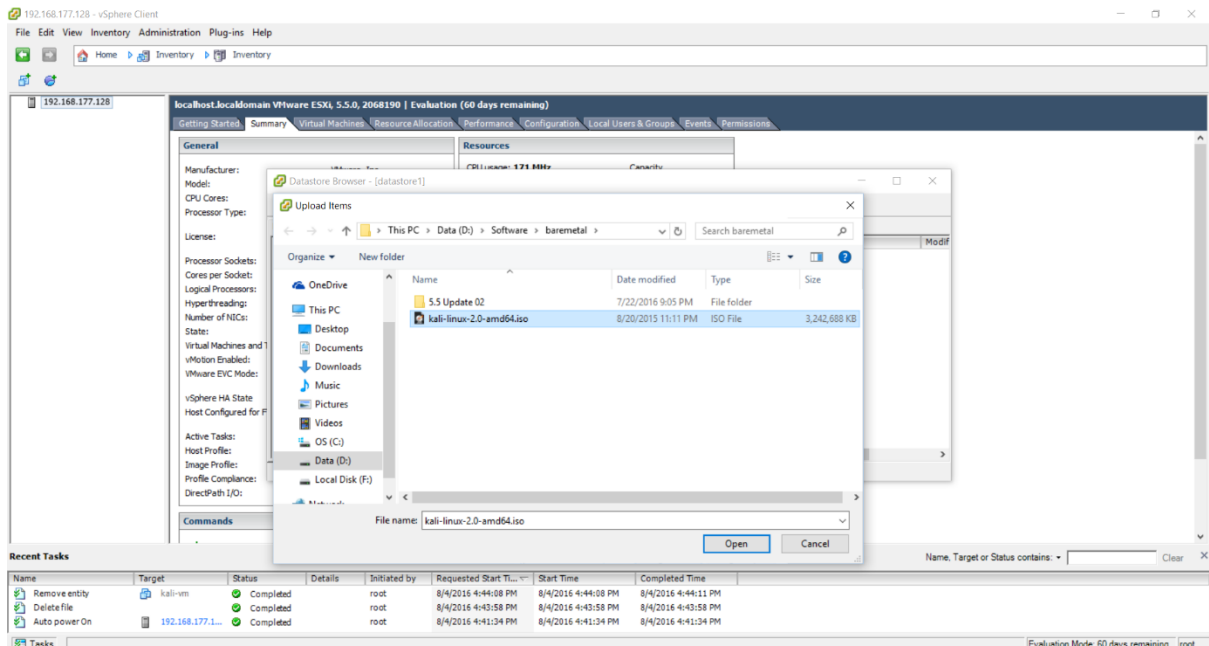

Choose 'Upload File' from 'Upload files to this datastore' icon.

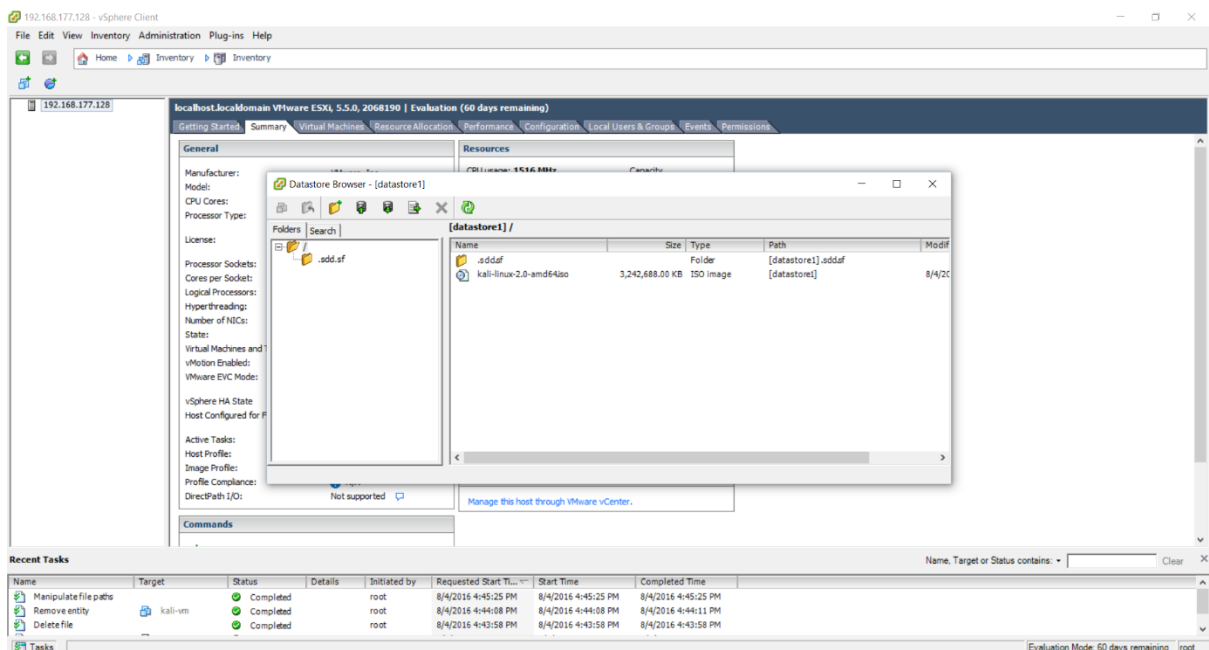

- Step 05

Browse for the ISO file of an OS and open it.

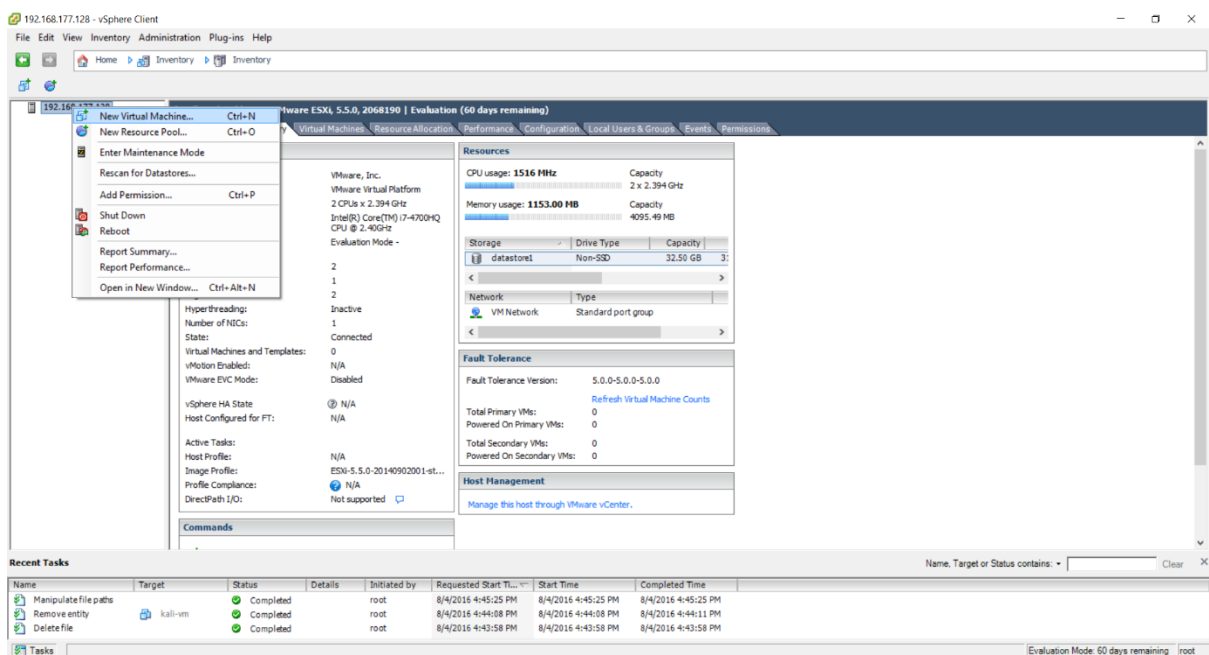

Then close the window after uploading is finished.

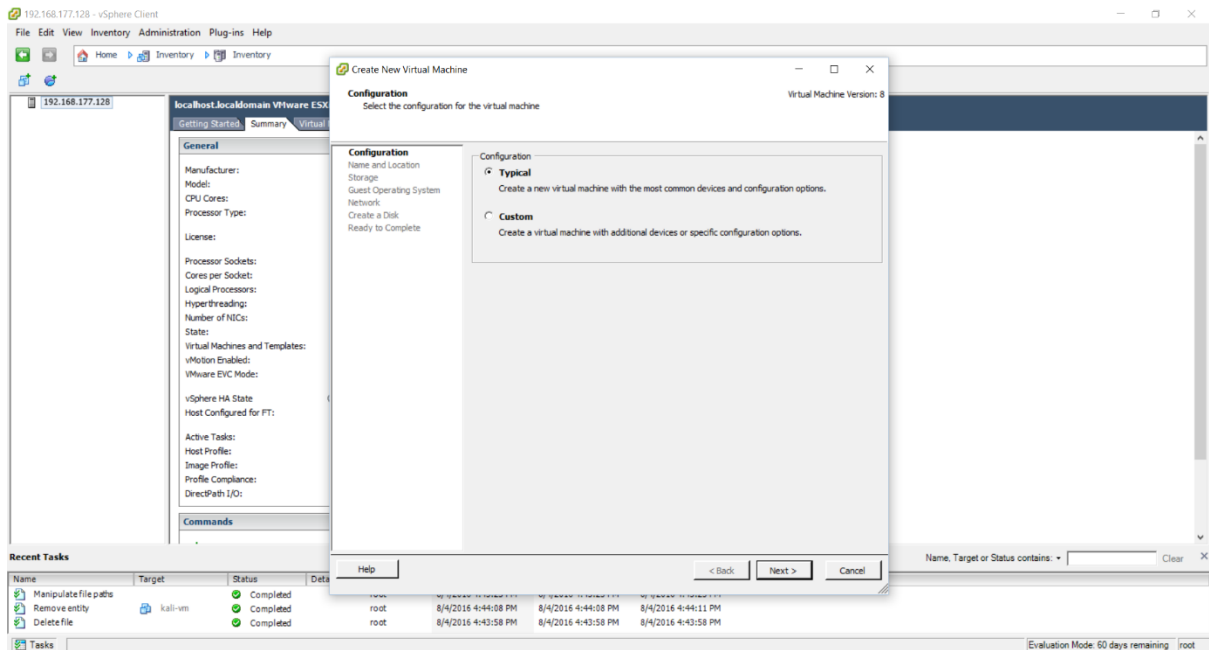

- Step 06

Right click on the host and choose 'New Virtual Machine'.

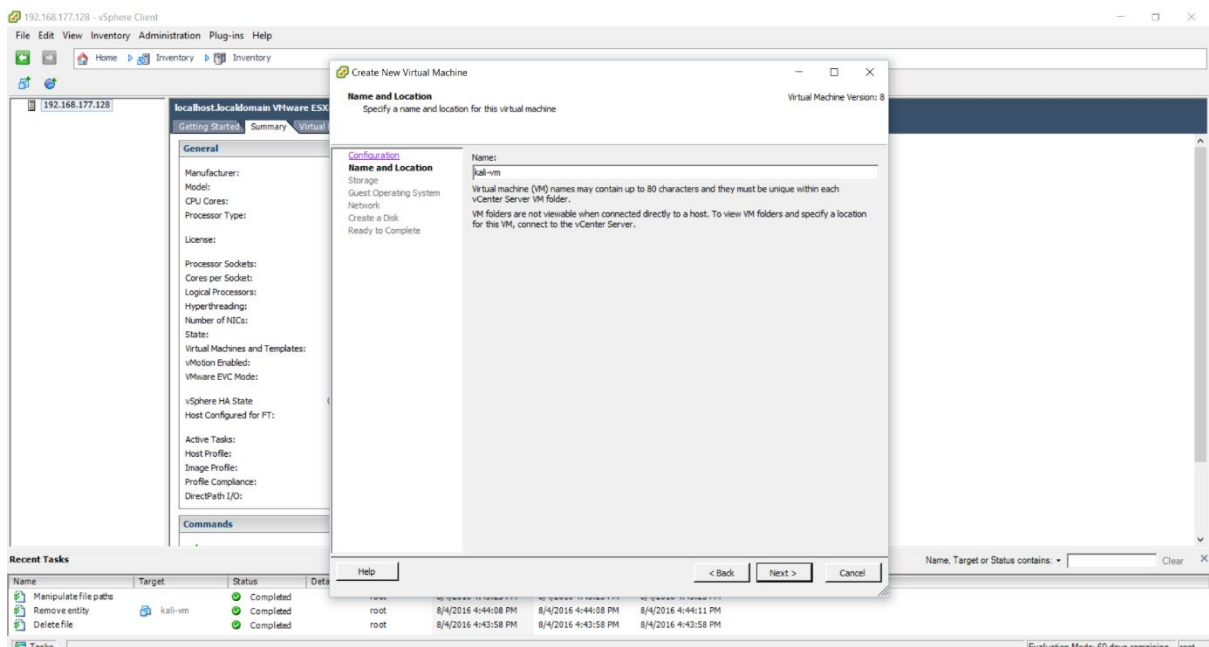

- Step 07

Select 'Typical' under 'Configuration' and click 'Next'.

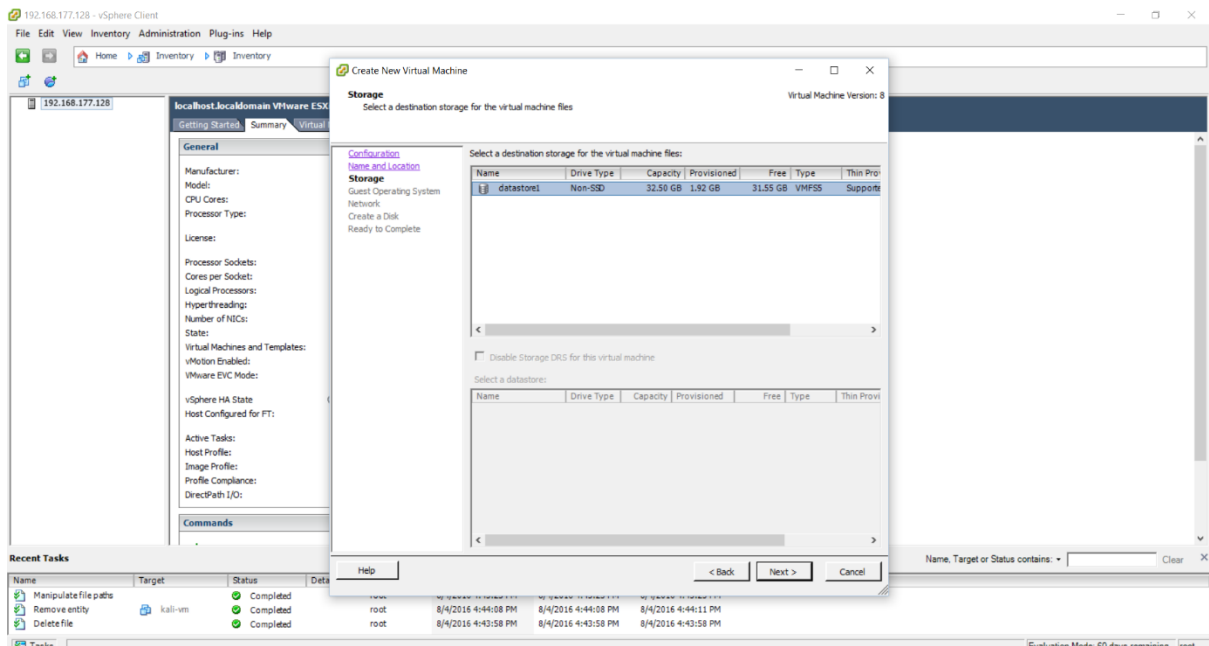

- Step 08

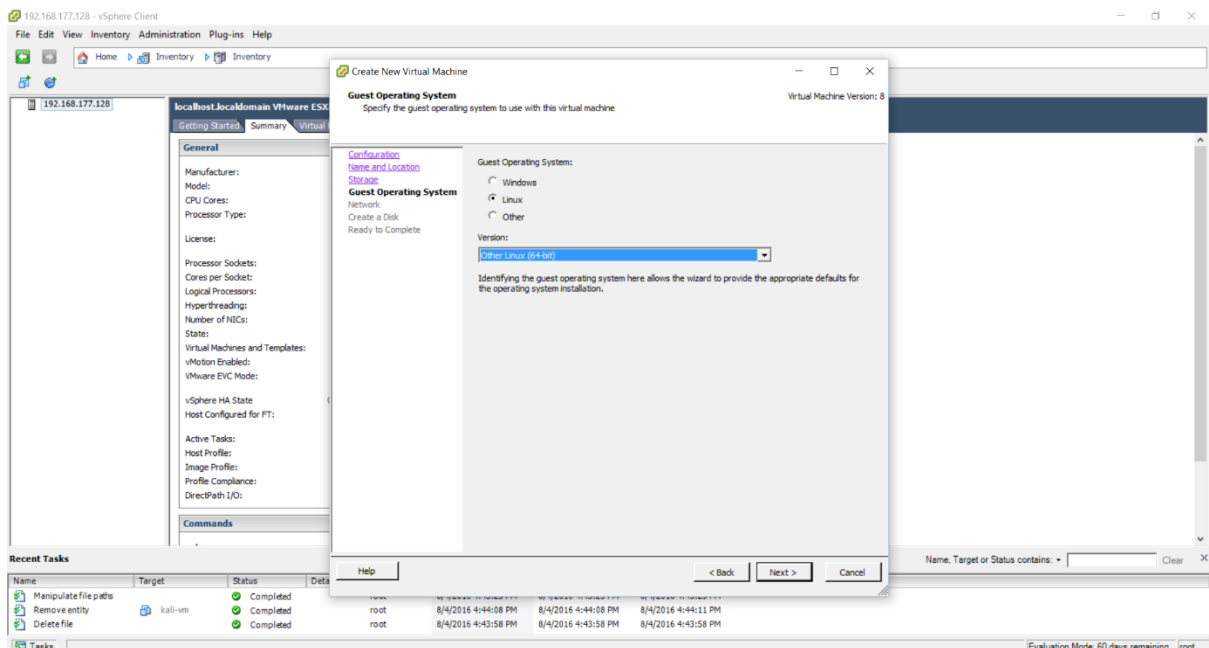

Provide a name for the virtual machine and click 'Next'.

- Step 09  
Click 'Next' on 'Storage' section.

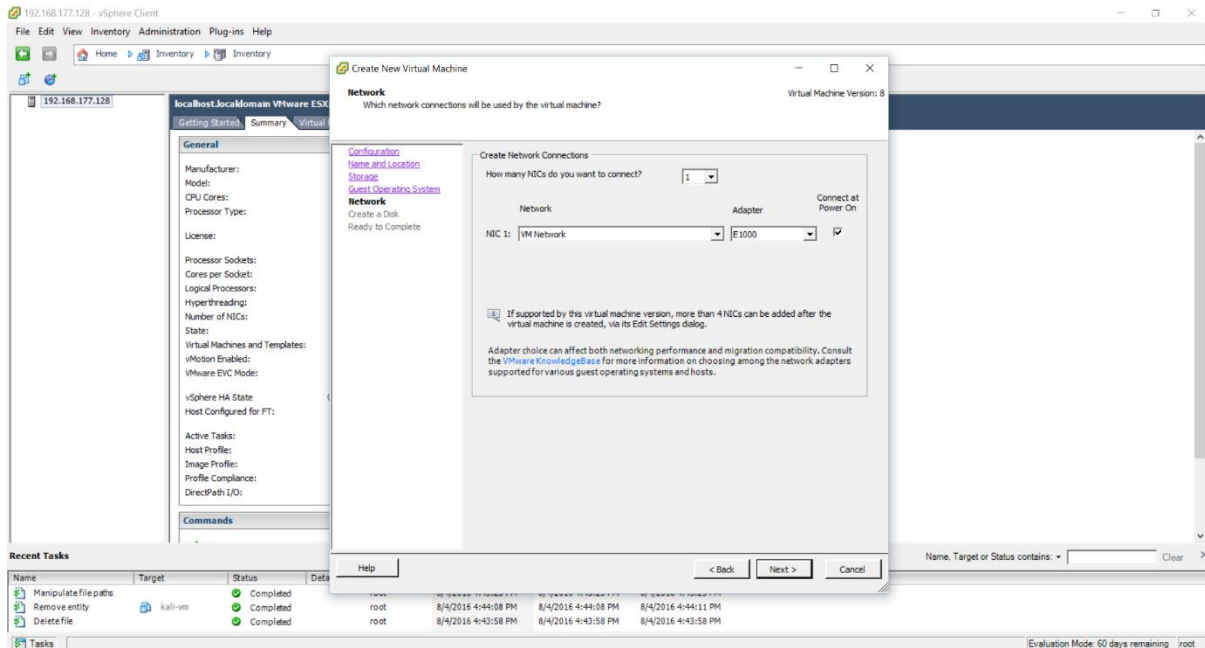

- Step 10  
Select 'Linux' under 'Guest Operating System'.  
Choose 'Other Linux (64-bit)' and click 'Next'.

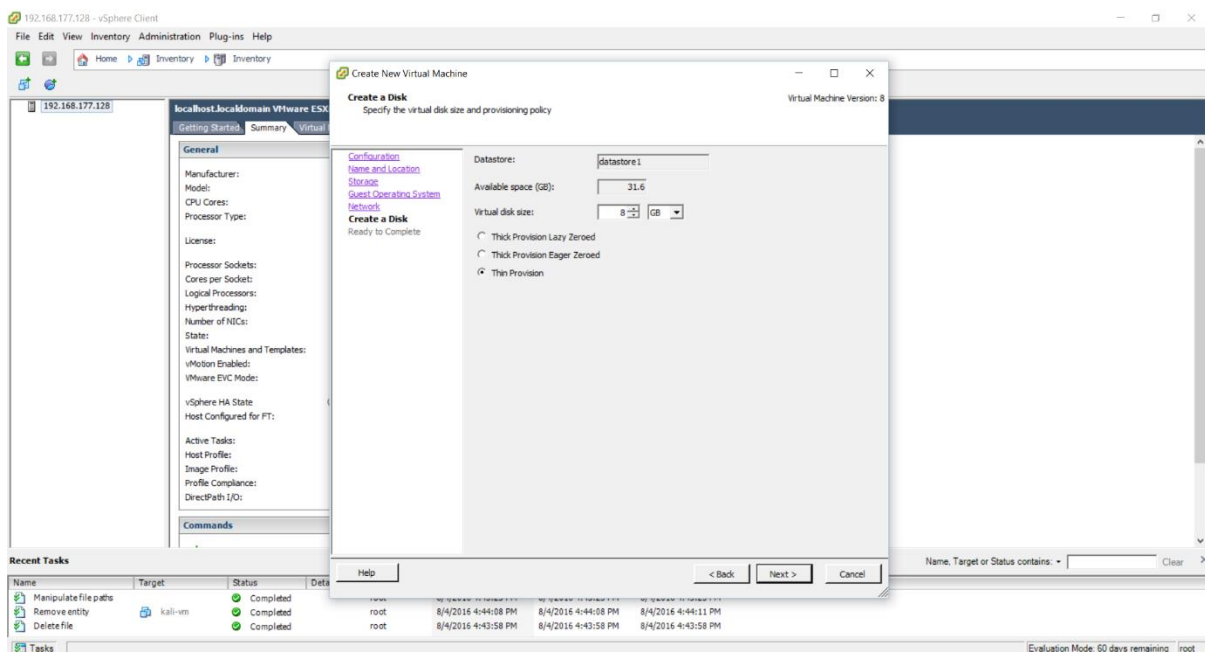

- Step 11

Click 'Next' on 'Network' section.

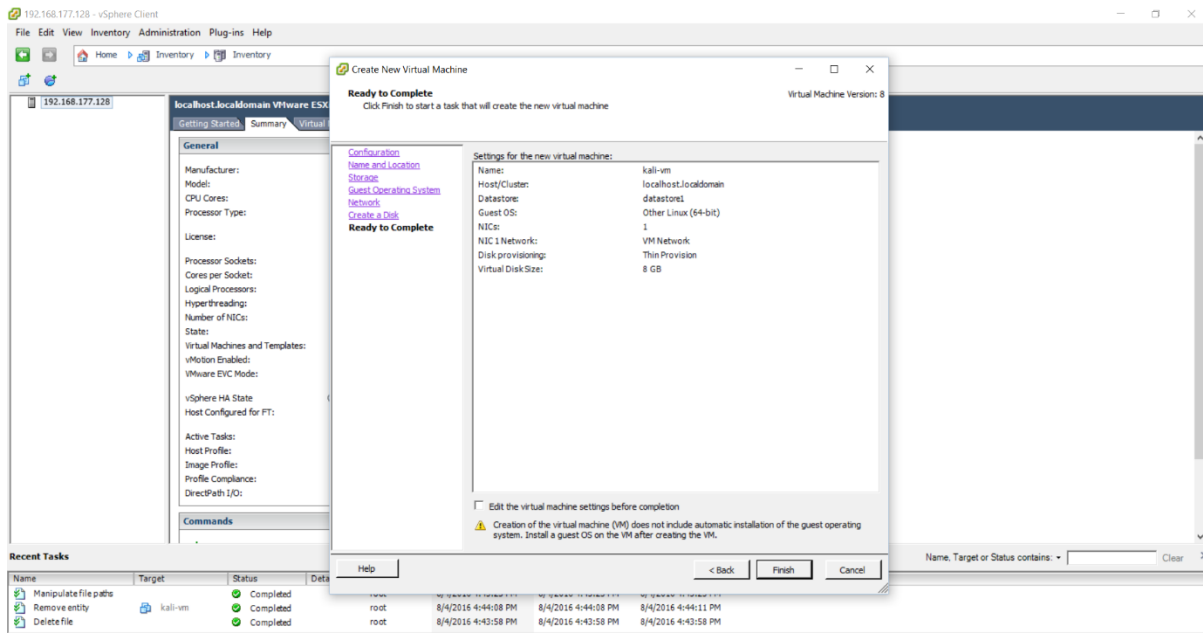

- Step 12

Select 'Thin Provision' on 'Create a Disk' section and click 'Next'.

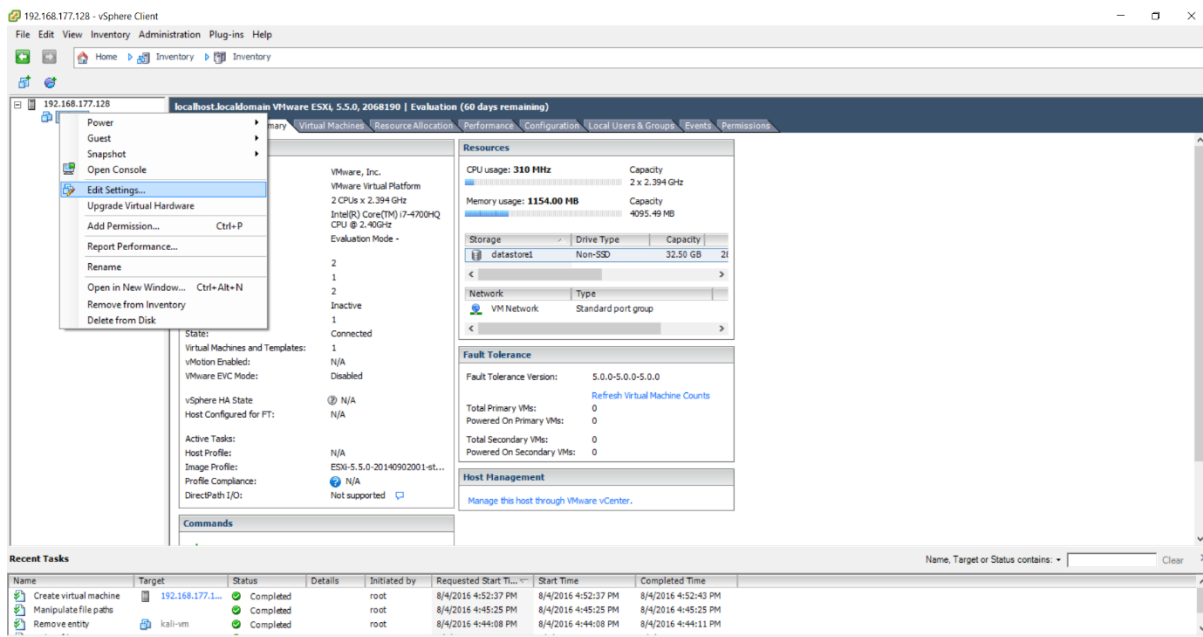

- Step 13  
Click 'Finish'.

- Step 14  
Right click on the created virtual machine and choose 'Edit Settings...'

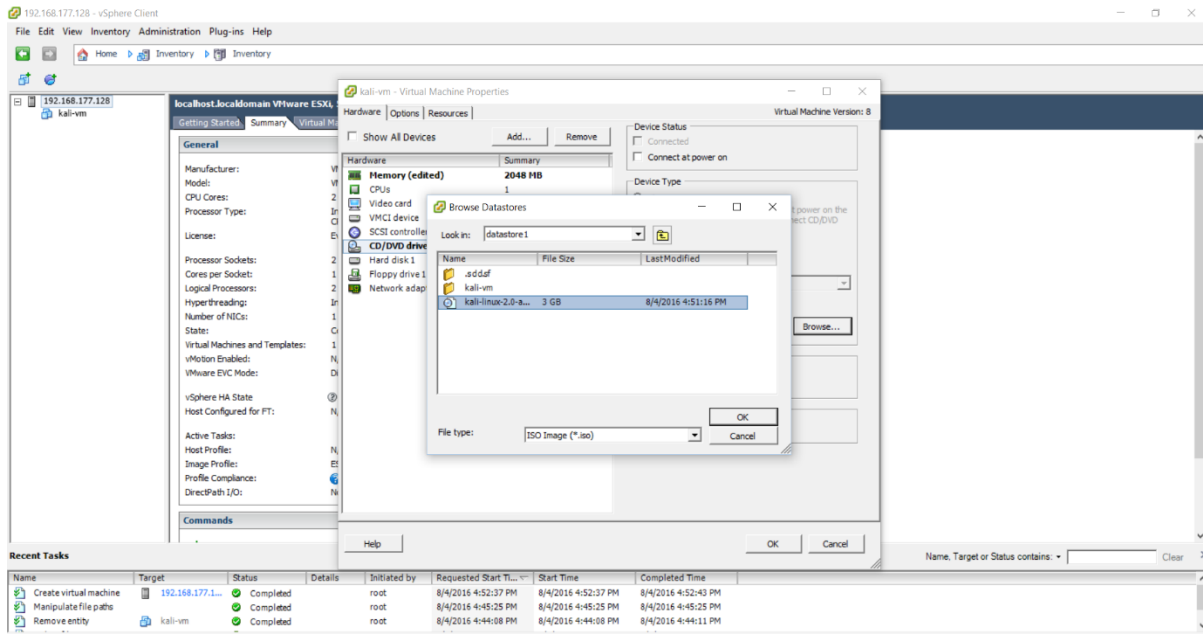

- Step 15

Change the memory size to 2048 MB.

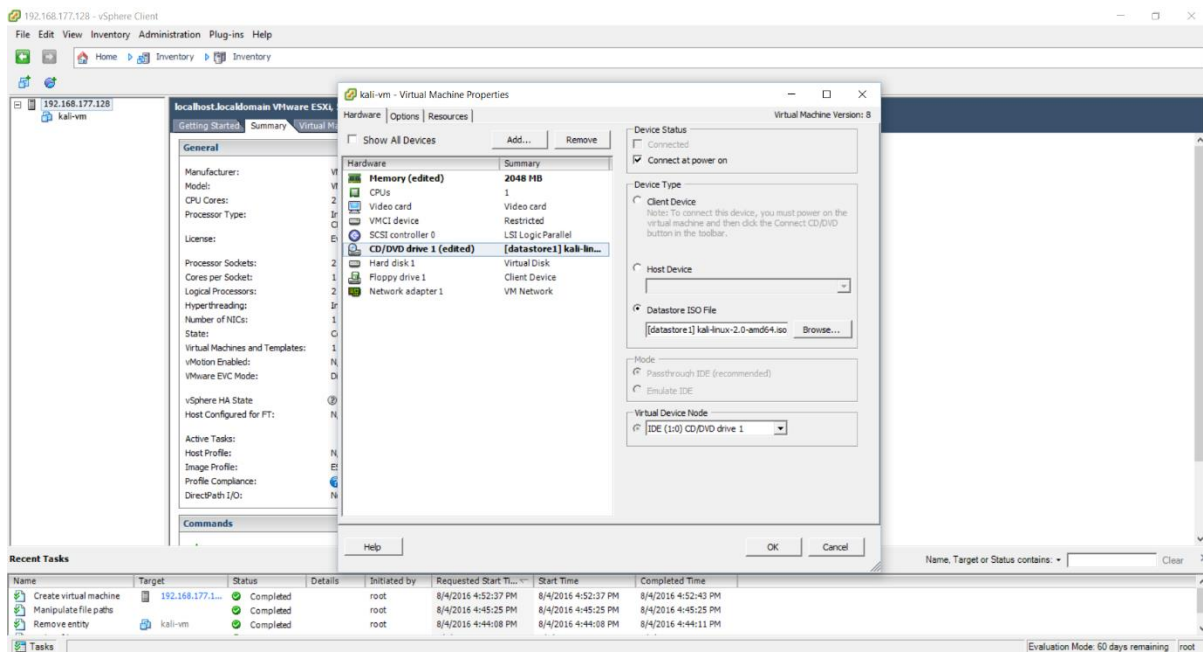

Select 'CD/DVD drive 1' and choose 'Datastore ISO File'.

Browse for the ISO file from the datastore.

- Step 16

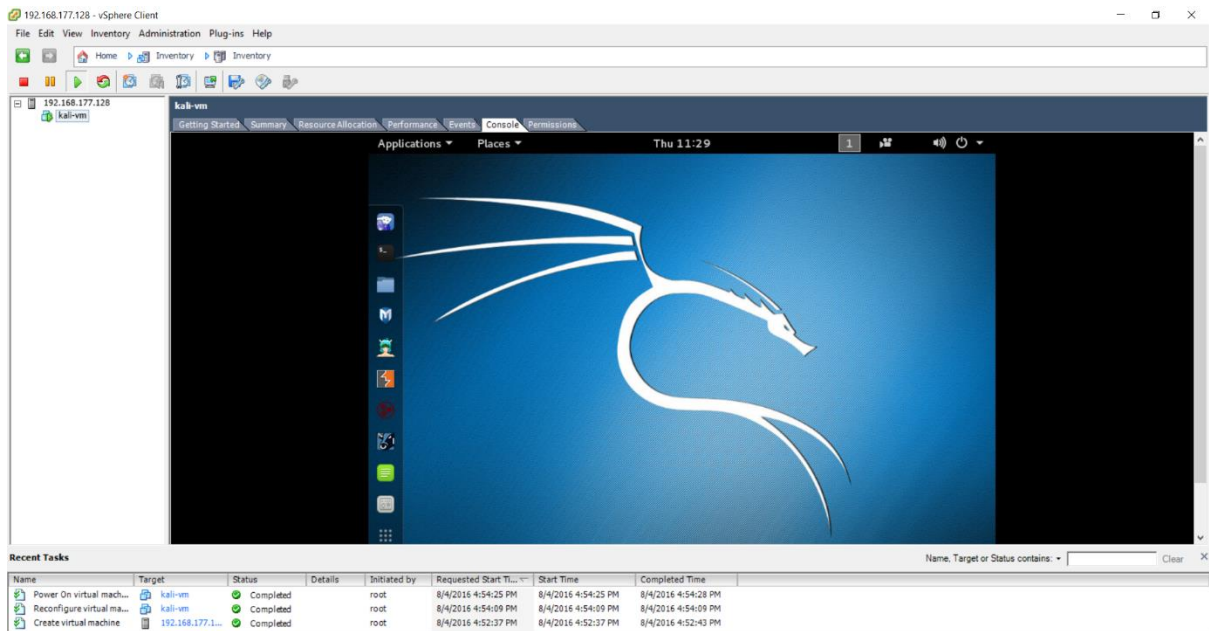

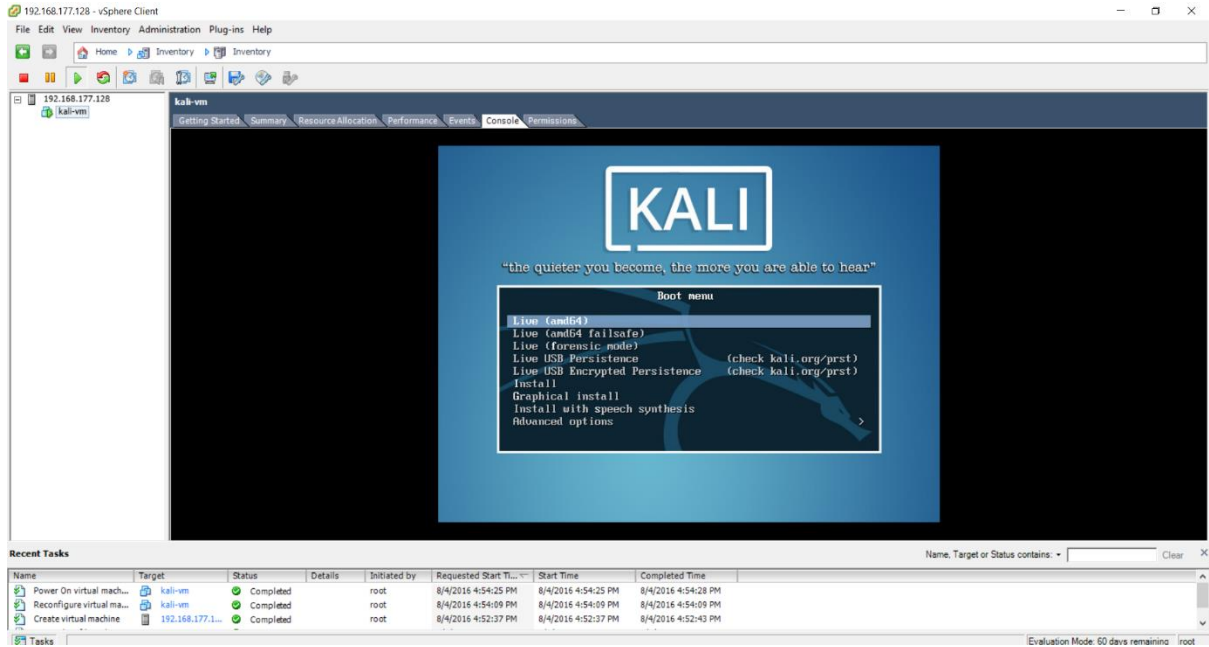

Select 'Connect at power on' from 'Device Status' and click 'OK'.

- Step 17

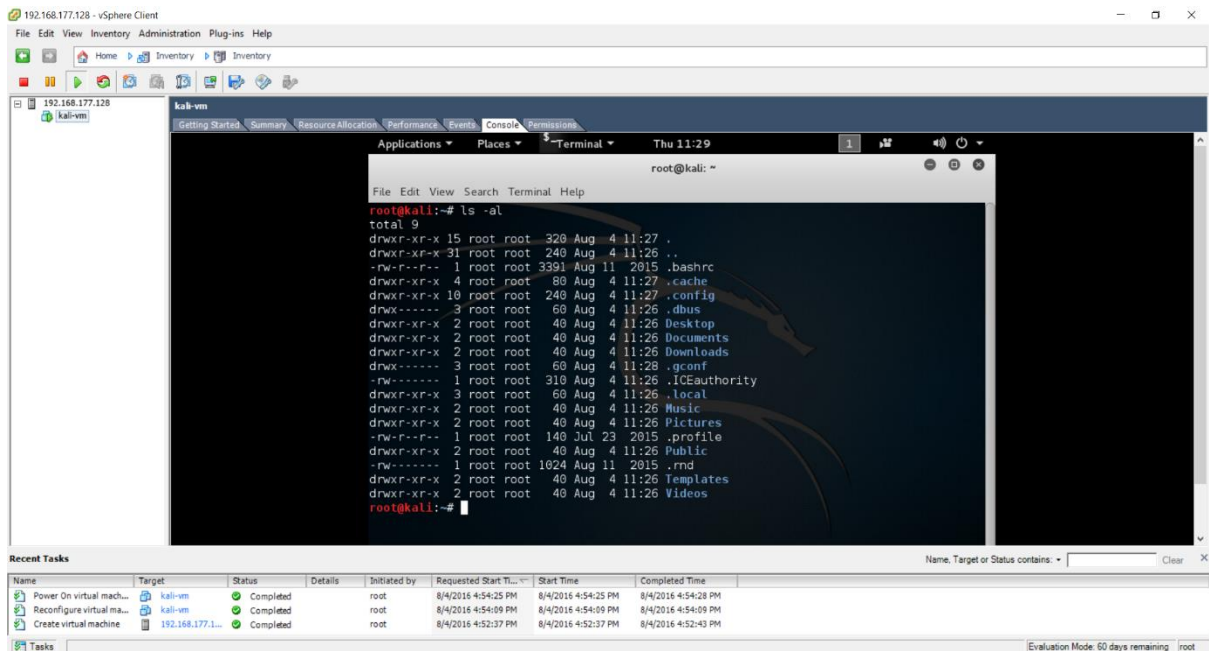

Go to the 'Console' tab and choose 'Live (amd64)'.

Press 'Enter' to start installing 'Kali' on the created virtual machine.

- Step 18

Open the terminal and type commands to check functioning.

- Step 19

Power off 'Kali'.

Shut Down 'ESXi'.
